1. This Office action is in response to the after final amendment filed 12/27/04 and entered, and refers to the final rejection mailed 9/24/04.

2. The following is an examiner's statement of reasons for allowance: the prima facie case of obviousness made by the combination of the Wu and Mimura references is rebutted by the showing of unexpectedly higher oligomerization rates and greater percentage of C-6 products found in the present invention versus those shown by either prior art reference individually. The formal amendments made in the after final amendment overcome the remaining formal issues.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
